John & Allison –

The below came from a childhood friend of my wife's who works for Science Friday. While I had at one point in a social setting mentioned that they should highlight all of our good climate work, they seem to be interested in the Animas River at the moment (the CPP is so last week...). Do you mind sharing with the 3rd floor comms folks?

Thanks!

-Wm.

Subject: Hello from SciFri

Hello, Will!

Rachel said she gave you a heads-up that I might be contacting you...and here I am. My colleague Becky is producing a segment on the mine waste spill in Colorado, and she's having a hard time finding an available guest. I remembered that you had kindly offered your services if SciFri was ever in need of someone from the EPA, which brings me to why I'm contacting you: Are there any scientists you know of who might be willing to talk with Becky about the spill? (We pre-interview all potential show guests.) I'm copying Becky on this email.

Thanks so much. Hope the new house is feeling like home!

Julie
